WORLD
IVERMECTIN
DAY
24 JULY 2021

We're uniting for ivermectin

Health professionals, lawyers, musicians, artists and people of all backgrounds and nations are joining together to spread the amazing news about ivermectin.

All about the evidence

The evidence is there: ivermectin, when used in combination with other medicines and supplements, can dramatically prevent and treat the effects of covid. Find out more about ivermectin at www.bird-group.org and covid19criticalcare.com

Saving lives now!

We are sharing the good news of how ivermectin is being successfully used by thousands of doctors in multiple countries as the way to prevent, treat and beat covid and end the pandemic. It is even effective against variants.
