

IVERMECTIN FOR COVID-19

A look at the last 2 years

3rd April 2020

Various regional health ministries and governmental authorities within Peru, Brazil, and Paraguay initiate "ivermectin distribution" campaigns to their citizen populations.

Oct/Nov 2020

Dr Pierre Kory (ICU Consultant) testifies to US State Senate saying ivermectin should be used for the treatment of covid-19.

10th December 2020

Dr Tess Lawrie (ex WHO consultant) sends rapid systematic review and meta-analysis on ivermectin to UK government, followed by an urgent video message.

14th-19th Jan 2020

Dr Lawrie holds BIRD meeting with 65 international doctors, scientists and other professionals from 14 different countries to discuss the evidence on ivermectin.

5th March 2021

Experts with no conflicts of interest gather for the International ivermectin for covid-19 conference.

21st June 2021

Oxford University announces it will add ivermectin to PRINCIPLE trial (it first announced this in January 2021) - but fails to do so once again.

6th August 2021

World Council for Health republishes covid-19 home treatment guide including ivermectin as an option.

Joe Rogan uses ivermectin, it helps, and gets ridiculed for doing so by the media.

15 October 2021

Robert F Kennedy Jr's book "The Real Anthony Fauci" gets published, detailing the corruption of science in favour of Big Pharma.

December 2021

Dr Andrew Hill, who is under investigation by French police for corruption, describes several ivermectin studies as fraudulent.

9th Feb 2022

Oracle Films release "A Letter to Andrew Hill".

11th March 2022

TOGETHER Trial published with numerous errors and inconsistencies – results differ from the 6th August presentation. Highly criticised by independent scientists, data analysts and doctors. Authors fail to respond to queries and fail to make the data available for independent verification.

13th April 2022

TOGETHER Trial is silently updated and republished with numerous errors and inconsistencies, without explanation.

16th June 2022

FLCCC updates Covid -19 Early treatment protocol and later introduces Post-Vaccine Treatment protocol.

9th July 2022

PRINCIPLE Trial is now paused to new registrations.

Ivermectin is currently used for about 27% of the world's population.

While the majority of higher-income countries with high vaccination rates are suffering recurring increases of covid-19 infections and hospitalisations, lower-income countries with low vaccination rates, who implement routine mass-prophylactic and early treatment drug administration (including ivermectin), have significantly lower infection rates.

Monash University (Caly et al) shows ivermectin eliminated SARS-Cov-2 in cell culture.

May 2020

Dr Andrew Hill appointed to do review of ivermectin for WHO and UNITAID.

Frontline Covid-19 Critical Care Alliance (FLCCC) develop the I-MASK+ protocol for early at-home and outpatient treatment, alongside the MATH+ treatment protocol for hospital-based treatment for covid-19.

8th December 2020

Trusted News Initiative agrees to work together to promote vaccines and prevent "harmful vaccine misinformation".

4th/7th Jan 2020

Dr Andrew Hill agrees to work on Cochrane review with Dr Lawrie's team, then publishes a pre-print concluding that more trials are needed.

Dr Tess Lawrie has zoom meeting with Dr Andrew Hill during which he admits that his conclusions had been influenced by his sponsor (UNITAID) and other unnamed authors.

Dr Andrew Hill says he'd like his brother to get ivermectin.

20th February 2021

FDA comes out saying ivermectin is a dangerous horse medicine.

24/25th April 2021

Bryant et al's meta-analysis and systematic review confirming that ivermectin would have a positive impact on covid-19 is peer-reviewed and published. No response from authorities and media. The paper is now in the top 10 out of 20 million most-read papers.

22nd June 2021

Press report on TOGETHER trial says ivermectin doesn't work - without peer review or a published paper in hand.

September 2021

Nebraska Attorney General evaluates the evidence on ivermectin and gives opinion in favour of its use.

16th November 2021

Lucy Kerr's study is published - the largest population study in Brazil (Itajai) ever - and shows ivermectin works as prophylaxis and prevents deaths.

17th January 2022

Dr Sabine Hazan publishes a study of high-risk patients with moderate to severe symptoms resolving on a combination of ivermectin, zinc and doxycycline.

4th March 2022

Phil Harper reveals Prof Andrew Owen, who has commercial interests in new drugs, as a hidden hand in Dr Andrew Hill's paper.

30th March 2022

Alexandros Marinos publishes analysis of serious problems with the TOGETHER trial, which appeared to intentionally undermine the evidence in favour of ivermectin.

5th May 2022

Dr Tess Lawrie gives witness statement in Paris to aid the French police investigation into the corruption of Dr Andrew Hill.

29th June 2022

Phil Harper publishes trailer for the upcoming documentary on the pharmaceutical industry's profiteering throughout the covid crisis.

July 2022
